hermann kappelhoff casts the evolution of cinema as an ongoing struggle to relate audiences to their historical moment appreciating cinema's unique ability to bind concrete living conditions to individual experience which existing political institutions cannot. he reads films by sergei eisenstein and pedro almodóvar by the new objectivity and the new hollywood to demonstrate how cinema situates spectators within society. kappelhoff applies the deleuzian practice of thinking in images to his analysis of films and incorporates the approaches of jacques rancière and richard rorty who see politics in the permanent reconfiguration of poetic forms. this enables him to conceptualize film as a medium that continually renews the audiovisual spaces and temporalities through which audiences confront reality revitalizing the reading of films by visconti fassbinder kubrick friedkin and others. kappelhoff affirms cinema's historical significance while discovering its engagement with politics as a realm of experience.

most american citizens are quick to criticize federal bureaucracy for its size and inefficiency they assume it has exceeded the intent of our nation s founders yet men like james madison and alexander hamilton knew that good public administrators were essential to good government william richardson here examines the origins legitimacy and limitations of public administration from the perspective of the founders thought he shows that these men especially the

authors of the federalist advocated an energetic public administration as an essential component of government and even considered the emergence of a natural aristocracy of virtuous civil servants the founders would see the fault of today's federal bureaucracy argues richardson not as much in its size as in the character of its members richardson relates the founders belief that the nation should strive to produce public servants committed to developing character traits such as wisdom and moderation that would exemplify the highest ideals of the republic and thus ensure its survival they anticipated some self interest on the part of administrators but believed it would be held in check by public opinion and the political process to test the success of the founders ideal richardson examines both the character of administrators and the role of ethics in forming that character he explores the various plans for educating public leaders throughout american history and looks at how attitudes toward public administration have changed in this century from woodrow wilson's scientific ideal to recent proposals to downsize government among other suggestions richardson advocates reforming existing institutions by emphasizing character democracy bureaucracy and character is an exercise in legitimizing public administration offering important insights into the founders thoughts that can be applied to today's debate over government bureaucracy public administration may be problematic by nature observes richardson but it is crucial to our form of government through his analysis we can see that while bureaucracy and democracy have long had an uneasy relationship neither can be effective unless we fully assess the place and purpose of character in the american regime
